

# PROFESSIONAL DEALING MAINLY

Confusion of Speculative Sentiment Discernible in Movement of Prices.

## BANK OF ENGLAND POSITION

It Continues to Grow Stronger. Demand for Gold, However, May Be Renewed.

NEW YORK, November 26.—Confusion of speculative sentiment was discernible in the movement of prices of stocks today, and the activity of the trading was contracted largely. Operations were left largely in the hands of professional traders. The confusion was due to the fact that the Bank of England had announced that it would not support the market with gold, and that it would only support the market with its own credit. This announcement was interpreted as a withdrawal of support from the market, and it was expected that the market would be weakened. However, the market was not weakened, and it continued to grow stronger. The demand for gold, however, may be renewed.

The position of the Bank of England continues to grow stronger. The Bank of England has announced that it will not support the market with gold, but it will support the market with its own credit. This announcement was interpreted as a withdrawal of support from the market, and it was expected that the market would be weakened. However, the market was not weakened, and it continued to grow stronger. The demand for gold, however, may be renewed.

There was some speculation in the market that the Bank of England might support the market with gold. However, the Bank of England has announced that it will not support the market with gold, but it will support the market with its own credit. This announcement was interpreted as a withdrawal of support from the market, and it was expected that the market would be weakened. However, the market was not weakened, and it continued to grow stronger. The demand for gold, however, may be renewed.
